November, 1987

In 1985, a revised source book was published under the title of "Data Sources For Planning In Alberta", by Research and Development Branch of Planning Services Division.

This source book was formatted so that it could be placed in an ordinary ring binder and pages changed as and when revisions are issued. Since 1985 many changes have taken place: some listings were deleted; many others were added; and several departmental and branch contact names were changed. In addition, the index was revised by listing the data elements by each generalized group, hopefully making the planning information easier to locate.

We are pleased to forward a copy of a new version of this publication that consolidates previous updates and incorporates additional listings. Please replace the old listings and index in your binder with this revision.

We hope that the source book is assisting in reducing the time and effort required to collect data so necessary to informed planning decisions.

As always we welcome updated information for revision purposes from any of the sources listed.
